

ENGLAND'S HUGE OUTPUT OF BIG GUNS SHOWN IN REMARKABLE PICTURES

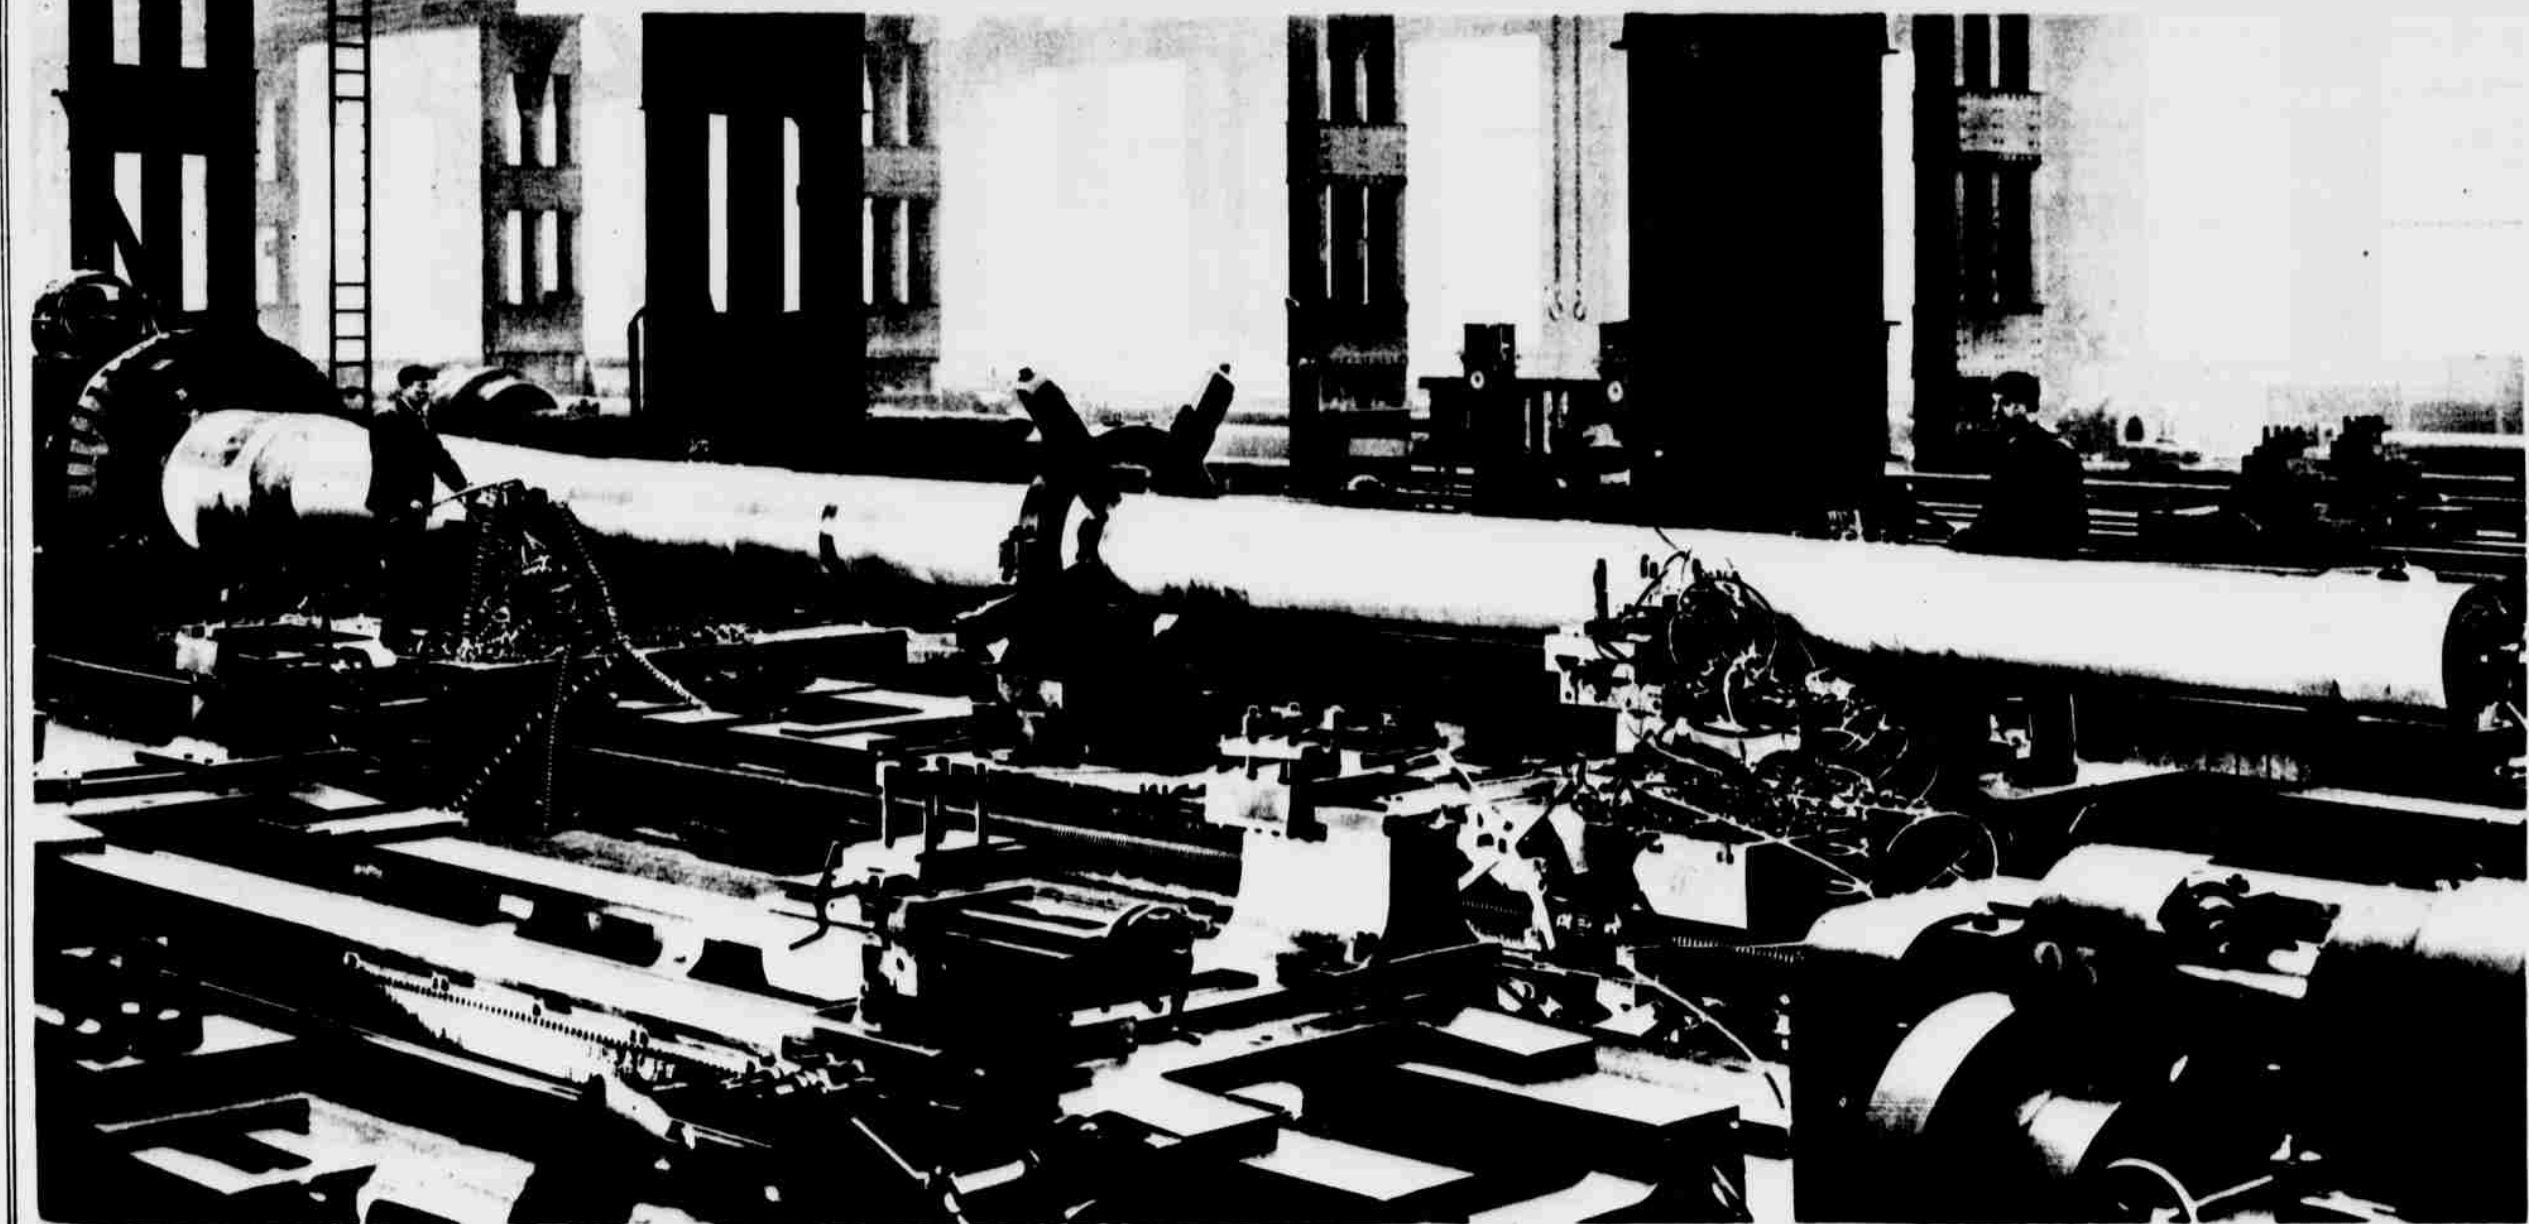

Ten inch guns of the type being used on the Somme ready for shipment. At the right, a big British howitzer in action on the Somme.

Showing destruction wrought by big guns. German fortified position in a French village blown to pieces.

Interior of the great factory at Manchester, showing 15 inch naval guns almost completed.

Turning a great 15 inch naval gun. This huge steel tube, the gun proper, will later be wound with wire and the external jacket shrunk on.
